

A Hub of Flexo & Corrugated Box Making Machinery

www.srspackagingmachines.com

ABOUT US

Established with our experience for over Three Decades , supported by our Professional Engineers, We focus on Providing Complete Solutions for the Flexo , Printing , Corrugated Board & Box making machinery.

We, as **SRS** team Listened carefully to the guidance of all our existing & New users, focussed on Multiple Series of Semi Automatic & High speed Fully Automatic , that are highly praised & favoured by USERS.

SRS team feeds back to customers with "**Excellent Design , Careful Manufacturing , Service Paramount, keeping Innovation , Following Excellence, Management Localisation, Development Globalisation to establish Long term Strategic goals of Internationalisation**"

We at **SRS** adhere to the Tenet "**SURVIVE BY QUALITY, SEEK DEVELOPMENT with SCIENCE & TECHNOLOGY**"

Integrate the essence of carton machinery with scientific research & development to make the operation more convenient, Quick to improve the work efficiency.

Because of the beautiful & tasteful appearance, Compact & Careful Technology, Reasonable Price & Perfect After Sales-Service has made us Pioneers in serving.

When it comes to Packaging Machinery we can answer more questions than you can ask.

So LET US HAND in HAND move to **VICTORY**.

Head Office : Plot No. 22, Gali No. 2, Mauja Sihi, Mujeri Modh, Ballabgarh, Faridabad
Branch Office : Shed No. 150, DSIDC, Okhla Industrial Area, Phase-1, New Delhi-110020
Contact : 9710720300, 9810720300, 9710720400, 9810720400

Corrugated Paperboard Production Line Introduction

Corrugated cardboard production line includes mill roll stand, single facer, pre-heater, conveyer bridge, gluing machine, slitter scorer machine, cut off machine and stacker. We can produce the three ply, five ply and seven ply corrugated cardboard production line, Width from 1400 to 2500mm, production speeds from 40 to 250 meters/min Customer's can choose according his own needs. We can provide a complete production line and can also provide individual parts to complete customer's own line.

Technological Parameters (5-Layer)

Technological Parameters	QHCL-80-1800	QHCL-120-1800	QHCL-180-1800
Line size L*W*H(m)	56×4.5×4.2	67×4.5×4.2	82×4.5×4.5
Factory size L*W*H(m)	60×11×5	72×11×5	88×11×6
Total Power (about)	100kw	180kw	250 kw
Steam Cost	0.8~1.2Mpa (Advise 2t/h boiler)	0.8~1.2Mpa (Advise 4t/h boiler)	0.8~1.2Mpa (Advise 4t/h boiler)
Starch Cost (g/m ²)	20-26	20-26	20-26
Raw paper width (mm)	1800	1800	1800
Mechanical Speed	80m/min	120 m/min	180m/min
Economical speed	60m/min	90m/min	150 m/min
Shift capacity (*10 ⁴ m/8h)	3	4.5	9
Transversely cutting precision	±1	±1	±1
Transversely cutting scope (mm)	500-9999	500-9999	500-9999
Slitting scope (mm)	145-1800	160-1800	160-1800
Slitting precision (mm)	±1	±1	±1
Workers	8-11	8-11	8-11

Equipments List (5-Layer)

Equipment Name	SRS - 80 - 1800	SRS - 120 - 1800	SRS - 180 - 1800
Mechanical Roll Stand (include the paper roll rail)	3unit	5units	5units
Hydraulic Roll Stand (include the paper roll rail)			5units
Pre-heater Φ600mm	4units		
Pre-heaterΦ900mm		4units	
Pre-heaterΦ1000mm			4units
Vacuum Single Facer (RollΦ280), gimbal drive	2units		
Vacuum Single Facer (RollΦ320), gimbal drive		2units	
Vacuum Single Facer (RollΦ380), gimbal drive			2units
Transport Bridge (Electrical adjust the precision, vacuum tighten and loosen.)	1set		
Heavy model transport bridge (Electrical adjust the precision, vacuum tighten and loosen.)		1set	1set
Triple preheater Φ600mm	1units		
Triple preheater Φ900mm		1units	
Triple preheater Φ1000mm			1units
Double Gluer - B	1units	1units	
Heavy model double gluer -C			1units
Double baker (600mm X14heat plates, 6meter cooling part.)	1units		
Double baker (600mm X15heat plates, 7meter cooling part.)		1units	
Double baker (600mm X18heat plates, 9meter cooling part.)			1units
High-Speed Thin Blade(Electrical up and down, electrical adjust the precision.)	1units	1units	
NC Thin Blade (Computer control)			1units
NC Cutter (Servo, straight knife.)	1units	1units	
NC Cutter (Servo, spiral knife.)			1units
Paperboard Conveyor (right-angle shape)	1units		
Stacker		1units	1units
Glue System		1set	1set
Steam System (Not include boiler and pipes)	1set	1set	1set

Corrugated Paperboard Chart

Corrugated Paperboard Carton Factory

Single Facer Line(2-Layer Corrugated Paperboard Production Line)(2-Ply Corrugated Paperboard Line)

The Single facer Line is composed of Paper Roll stand, Single facer machine, Paper cutting machine. To use the web paper material single face machine production line, producing and cutting single face corrugated paper as required sizes, it forms the corrugated board with no need drying.

SRS-SFL-4 High-speed Single Facer Line

Technological Parameter:

Working Width	1400mm	1600mm	1800mm	2000mm
Heating method	Steam heating			
Design speed	120-150m/min			
Economical speed	100-120 m/min			
Compress-air pressure	0.4-0.9MPa			
Flute type	Standard flute	UV Flute		
	Standard spec.	A,B,C,E,F		
For other type and model, we can produce as customer's requirement.				

SRS-SFL-1 Single Facer Line

Roll Stand

Single Facer

Sheet Cutter

Technological Parameter:

Working Width	1400mm	1600mm	1800mm	2000mm
Heating method	Electrical heating/Oil heating / Steam heating			
Design speed	100m/min			
Economical speed	60-80 m/min			
Compress-air pressure	0.4-0.9MPa			
Flute type	Standard flute	UV Flute		
	Standard spec.	A,B,C,E,F		
For other type and model, we can produce as customer's requirement.				

SRS-SFL-2 Single Facer Line

Roll Stand

Single Facer

Sheet Cutter

Technological Parameter:

Working Width	1400mm	1600mm	1800mm	2000mm
Heating method	Electrical heating/Oil heating / Steam heating			
Design speed	60m/min			
Economical speed	40-50 m/min			
Compress-air pressure	0.4-0.9MPa			
Flute type	Standard flute	UV Flute		
	Standard spec.	A,B,C,E,F		
For other type and model, we can produce as customer's requirement.				

SRS-SFL-3 Single Facer Line

Roll Stand

Single Facer

Paperboard Cutter

Technological Parameter:

Working Width	1200mm	1400mm	1600mm	1800mm
Heating method	Electrical heating/Oil heating / Steam heating			
Design speed	30-40m/min			
Economical speed	25-30 m/min			
Compress-air pressure	0.4-0.9MPa			
Flute type	Standard flute	UV Flute		
	Standard spec.	A,B,C,E,F		
For other type and model, we can produce as customer's requirement.				

SRS-SF-320C/360C/380C/405C Muti-cassette Positive Pressure Single Facer

- Design speed : 250m/min.
- Effective width : 1400mm - 2500mm.
 - Corrugated roller : ϕ 360mm (small differences according to corrugated type).
 - Pressure roller: ϕ 410mm, preheat roller: ϕ 400mm.
 - Using negative pressure type design helps the medium paper to press evenly and closer to the surface of corrugating roll to have perfect forming. And also get even gluing on the flute tip to have perfect laminating of the single facer.
 - Quick change rolls in 15 minutes, while replacing the corrugated rolls, the whole complete set of additional rolls with cassette is delivered into the machine by the carriage and matched with the hydraulic motor to be fixed on the base of the machine by hydraulic system. Quickly and easily complete the corrugated roller replacement.
 - The corrugating rolls, pressure roll, and glue roll are adopted with High stability of the airbag control system, also with pneumatic control buffer effect

- Adopt Glue width motorized dividing to match the paper width. Idle running motor for glue applicator roll to avoid glue dry. Adjustment for gap between glue roller and doctor roller by electric. Digital read out for the gap between glue roll and doctor roll.
- The moveable type glue unit is convenient to clean and maintain.
- Easy operation control system. Touch screen with colorful drawing displays operation state, easy and simple to handle.
- Built-in pre-conditioner with proportional spraying device for the medium moisture and temperature adjustment.

SRS-SF-320C/360C/380C/405C Fingerless Type Single Facer

- 380S Design Speed: 200m/min • 405S Design Speed: 220m/min
- Effective width: 1400mm-2500mm • Corrugated roller: ϕ 380mm/405mm
- Fingerless vacuum suction type single facer, the upper and lower corrugated roller made of 48 CrMo alloy steel, with harted treatment, the hardness is above HRC58° - 60° The surface is well treated by grind and plated chrome.
- With preheater for liner paper and steam spray device for medium paper.
- Upper and lower corrugated roller are unit assemblage, the whole corrugated rollers group can be move and quick replacement, to change flute type quickly.
- Glue section are unit assemblage, whole section can be moved by track, save maintenance time.
- Adjustment for corrugated roller, pressure roller, and glue roller by pneumatic system.
- Frequency conversion motor as main drive, independent gear box connect with three gimbal axis, Inverter to make stepless speed regulation for save power, and to keep one communication connector for production management.
- Oil immersed type lubricating to reduce noise keep running stable, prolong the use life of gear.
- Adopt Glue width motorized dividing to match the paper width. Idle running motor for glue applicator roll to avoid glue dry. Adjustment for gap between glue roller and doctor roller by electric or manual are optional, Digital read out for the gap between glue roll and doctor roll is optional.
- Bearing for corrugated rollers, and pressure roller adopt high-temperature lubricate grease to keep running smoothly and durably

SRS-SF-270L/280L/320L/360L/380L Fingerless Type Single Facer (Vacuum Suction Type)

- Corrugated roller is made of special alloy steel of 48CrMo alloy steel with grinding process and hardened with hardness of HRC58° - 60°.
- Oil lubrication type gear box, low noise and gimbal transmission, also separate power. Main motor is frequency conversion control (optional).
- Vacuum suction system provides perfect flute shape even at high speed, blast volume controller is equipped.
- Bearings of corrugated roller and pressure roller are lubricated by high temperature lubricating grease.
- Surface of gluing roller are treated by special mesh snicked and chromeplated. Automatic and cyclic supply glue for the glue unit.

SRS-RS-1 Hydraulic Mill Roll Stand

Technological Parameters:

- Working width: 1400mm-2800mm.
 - Maximum paper roll diameter: ϕ 1500mm.
 - Single side Max. Load: 2.5T.
 - Main axis: ϕ 270mm
- HS CODE: 844180900

SRS-RS-2 Mechanical Roll Stand

Technological Parameters:

- Paper roll frame working model: Mechanical electrical operation.
- Paper roll length scope: Max.: 2000mm Min.: 400mm
- Paper roll diameter scope: Max.: 1400mm Min.: 400mm
- Single side max. load: 1.5T.
- Motor power: all are planet cyclo motor

SRS-RS-3 Electrical Roll Stand With Shaft

Technological Parameter:

Model	Max. width	Min. width	Max. diameter	Max. Load
QHRS-3-1200	1200 mm	600 mm	1500 mm	2.5t
QHRS-3-1400	1400 mm	600 mm	1500 mm	3.0t
QHRS-3-1600	1600 mm	600 mm	1500 mm	3.0t
QHRS-3-1800	1800 mm	600 mm	1500 mm	3.0t
QHRS-3-2000	2000 mm	600 mm	1500 mm	3.0t
QHRS-3-2200	2200 mm	600 mm	1500 mm	3.0t

SRS-PH600(900)Preheater

Main Features

- Diameter of pre-heater roller:φ600mm,φ900mm.
- Effective width: 1400mm-2500mm
- Electromotion heating angle adjustment. Adjustable range of 360°.
- Surface of all rollers are well treated by grind and plated hard chrome,glabrous and durable.
- Adopt dishing seal or plat design. Insure reel paper be heated averagely.

SRS-GM240/270/320 Double Glue Machine

Main Features

- Design speed:150m/min
- Special line on the surface of the glue applicator roller,surface are hard chrome palling,even glue supply,low cost.
- The glue applicator driven by frequency conversion motor with inverter. Keep the synchronization for glue applicator roller and double baker facer machine by inverter. And independent running.
- Adjustment for gap between glue roller and doctor roller by electric or manual are optional, Digital read out for the gap between glue roll and doctor roll is optional.
- Press roll moves up and down by pneumatic. Gap mini-adjustment by electric.
- Self-circulating glue supplying system to avoid glue hardening and to control glue quantity Keeping the glue good quality and saving.

Double Facer(Dry And Mould System)

- Design speed: 40-200m/min
- Working width: 1600mm-2500mm
- Hot-plate surface is treated with grinding and hard chrome plating;
- Pressure type: pressure-roller or touch-plate;

Transport Bridge

Transport bridge is used for transport the paperboard during the production. It include the vacuum absorb part, it make the corrugated paperboard production more easier and working good.

Technological Parameters:

- Working width: 1600mm, 1800mm, 2000mm, 2200mm,2500mm

SRS-BD-Thin Blade(Paperboard Slitter Scorer)

This machine is one of the most important part of corrugated paperboard production. It is used for slitting and press line on the paperboard.

SRS-BD-E On-line Thin Blade

SRS-BD-M Thin Blade

Model	QH-BD-1	QH-BD-2
Max paperboard size (mm)	1200 ~ 2500mm	1200 ~ 2500mm
Max mechanical speed	150m/min	100m/min
Blade knives	5 knives	4 knives
Presslines	8 pairs	6 pairs
Min slitting width (mm)	120	130
Min pressing width (mm)	25	30
Outer diameter of the thin blade	220mm	220mm or 200mm
Thickness of the thin blade	1.2mm(steel), 1.4mm (alloy)	1.2mm(steel), 1.4mm (alloy)
Pneumatic pressure	< 0.4mpa	< 0.4mpa

SRS-BD-N Automatic Computer Control Thin Balde NC Slitter Scorer

NC Thin Blade Slitter Scorer machine is used for slitting and scoring on the corrugated paperboard. It is fully controlled by computer, automatically change order, improve the production efficiency. Order change fast, order change time is 3-8s.

Technological Parameters:

Items	Parameters
Width	1600 ~ 2500mm
Design Speed	200m/min
Working Speed	160m/min
Order change time	3s-8s
Order change precision	±0.5mm
Knife & score	5 slitting knives, 8 score lines
Min. Slitting width	310mm
Min. box height	0mm
Web-guiding scope	±100mm
Min. box cover width	100mm
Machine size	3680*1650*2340(mm)
Power	16.25kw

SRS-CT-Single Paperboard Cutter (Computer control with spiral knife)

Introduction

QHCT-single series NC paperboard cutter is mainly used for the transversely cutting of the corrugated paperboard, single-face paperboard, industrial paperboard. It is connected to the high-speed 7-layer, 5-layer, 3-layer corrugated paperboard production line and single-facer line. It has high working speed and high cutting precision. The Computer control system use German servo control technology. The technology is advanced all over the world.

Technological Parameters

Working width: 1600mm ~ 2500mm
 Max. Cutting speed: 100-250m/min
 Cutting length: 500mm – 9999mm
 Cutting precision: ±1mm
 Power: 7.5kw - 15kw.
 Width of the production line: 1600,1800,2200, 2500mm
 Speed of the production line: <250m/min

SRS-CT-Double NC Paperboard Cutter (Computer control with alloy spiral knife)

Introduction

QHCT-Double NC paperboard cutter is mainly used for the transversely cutting of the corrugated paperboard, single-face paperboard, industrial paperboard. It is connected to the high or middle-speed 7-layer, 5-layer, 3-layer corrugated paperboard production line and single-facer line. It has high working speed and high cutting precision. The Computer control system use German servo control technology. The technology is advanced all over the world. The machine can cut different length paperboard at the same time.

Technological Parameters

Working width:1600mm ~ 2500mm
 Max. Cutting speed: 100 ~ 250m/min
 Cutting length: 500mm ~ 9999mm
 Cutting precision: ±1mm
 Power: 7.5kw ~ 60kw.
 Width of the production line: 1600,1800,2200, 2500mm
 Speed of the production line: <250m/min

Conveyor & Stacker

Introduction:

The gantry and stacker machine is the end part of the corrugated paperboard line. It is used for the stacking of the paperboards, and then transport out.

SRS-DS Down Stacker

Technological Parameter:

Type	Model-Width-Speed-Height-length	Dimensions(L X W X H) mm	Weight(ton)	Power(kW)
Medium-type	QHDS-1800-150-300-3000	11000x3000x2000	7.5	15
Medium-type	QHDS-2200-150-300-3000	11000x3400x2000	8.5	17
Medium-type	QHDS-1800-200-500-3000	12500x3000x2200	8.5	18
Medium-type	QHDS-2200-200-500-3000	12500x3400x2200	9.5	20
Medium-type	QHDS-2500-200-500-3000	12500x3700x2200	10.5	23

Max. sheet length: 3000mm
 Max. Speed: 150, 200m/min
 Max. stack height: 300, 500mm
 Max width: 1800, 2200, 2500mm.

SRS-GS Gantry Stacker

Technological Parameter:

Model	QHGS-1600	QHGS-1800	QHGS-2000
Max. working width	1600mm	1800mm	2000mm
Min. working width	300mm	300mm	300mm
Max. Speed	150m/min	150m/min	150m/min
Working speed	120m/min	120m/min	120m/min
Max. Stack length	2300mm	2300mm	2300mm
Min. Stack length	300mm	300mm	300mm
Max. Stack height	1500mm	1500mm	1500mm
Pneumatic pressure	0.6-0.9MPa	0.6-0.9MPa	0.6-0.9MPa
Power	9kw	11kw	13kw
Machine size (mm)	17600*2200*3500	17600*2400*3500	17600*2600*3500

SRS-AS Angle Stacker

Technological Parameters:

- Speed: 60-120m/min
- Working width:1600mm ~ 2500mm
- Max. Length of paperboard: 2400 mm
- Max.Height of paperboard: 200 mm
- Gas: 0.4-0.9Mpa
- Steam Pressure: 0.8-1.3Mpa
- Operation direction: Left or right (design as customer's workshop.)

SRS-FFG Automatic Flexo Folder Gluer Machine

Technological Parameter:

Model	SRS-FFG1440	SRS-FFG1228
Max.machine speed(sheets/min)	200	250
Max.feeding size (L×Wmm)	1440×2800	1200×2800
Min.feeding Size (mm)	400×1000	
Suitable for boardsheet	E-AB	

SRS-P-200/180/150 Flexo Printer Slotter Rotary Die Cutter Machine

Main Technic Parameter

Color group	to be configured according to user's needs		
Printing paper	A,B,C,A/B,B/C and A/B/C type corrugated paperboard (the maximum interval 11mm)		
Width of machine inside	2200mm	2600mm	2800mm
Max.paper size	900×2000mm	1200×2400mm	1400 ×2600mm
Max.printing size	900×1800mm	1200×2200mm	1400 ×2400mm
Skip feeding paper	1100×2000mm	1400×2400mm	1600 ×2600mm
positive knife	300×640mm	350×720mm	400 ×720mm
negative knife	300×720mm	350×740mm	400 ×740mm
Printing plate thickness	7.2mm	7.2mm	7.2mm
Design speed (piece/min)	200pcs/min	180pcs/min	150pcs/min
Economic speed(piece/min)	80-180pcs/min	80-160pcs/min	80-130pcs/min
Tinted precision	(color) ±0.5mm	(color) ±0.5mm	(color) ±0.5mm
Slotting precision	±1.5mm	±1.5mm	±1.5mm
Max.slotting depth	7 ×220mm	7×300mm	7×350mm
	increase the blade, increase the slot depth		
positive knife	150 ×150 ×150 ×150mm	170×170×170×170mm	170×170×170×170mm
negative knife	250 ×90 ×250 ×90mm	260×90×260×90mm	260×90×260×90mm
Max.die-cutting size	900 ×1900mm	1200×2300mm	1400×2500mm
Printing plate diameter (contain plate thickness)	φ300mm	φ405mm	φ480mm

Sample Printed Carton Photos

SRS-FP120 Flexo Printer Slotter Rotary Die Cutter

Main Features

- The electric appliances of the whole machine adopts the product of Schneider made in France.
- Adopting vertical gear driving, the gears are made by high frequency quenching and polishing.
- All the axles are chrome-plated in order to strengthen the hardness.
- The gears use a shower type circular lubricating.
- Back to zero and register automatically.
- Use mould units designing. Multi-color printing units can be combined and linked any way.
- The side baffle of feeding department and the grooving department are adjusted electrically.
- Adopting touching screen control and using frequency converter precisely

Technological Parameter

Serial	Name of parameter	Unit	Specification		
			QHFP900×2000	QHFP468×2200	QHFP538×2400
1	Width of inside machine	mm	2100	2300	2500
2	Maximum production speed	pieces/min	100	100	100
3	Maximum size of feeding	mm	900×2000	1400×2200	1600×2400
4	Minimum size of feeding paper	mm	280×600	370×600	400×700
5	Feeding paper by skip	mm	1100×1800	1600×2000	1700×2200
6	Maximum printing area	mm	840×1800	1350×2000	1550×2200
7	Precision of process printing	mm	±0.75	±0.75	±0.75
8	Thickness of standard printing plate	mm	7.2	7.2	7.2
9	Thickness of printing paperboard	mm	3-11	3-11	3-11
10	Minimum slotting space	mm	300×100×300×100	300×100×300×100	300×100×300×100

13	Printing roller axle-oriented regulating	mm	±10	±10	±10
14	General power	kw	18	20	22

SRS-FP80 Flexo Printer Slotter Rotary Die Cutter

Main Features

- Paper feeding the paper fed by pushing of chain
- Paper feeding roller: the up-axle uses ginning paper-feeding wheel while the down-axle uses steel ginning roller. The surface is hard chrome-plated, so that the paper can be fed smoothly and the corrugated paperboard will not be damaged.
- Printing roller: adopt the advanced convenient and practical hanging plate with hook slots. (Optional) The loading and unloading of the plate can be independently controlled by the pedal switch. The phase is adjusted digitally non-stopped at 360°. You can input the data according to the error and it will adjust automatically.
- Ink circulating system:
 - ①The Anilox roller adopts the combined roller of 200/220 steel wire.
 - ②The rubber roller is made up of natural rubber which is oil-proof, acid-proof and alkali-proof.
 - ③Halting with the ink well-distribute. The ink circulating system works when the machine stops for a short time. Clean-free to ensure the quality of the printed things and make the color show no difference.
- Slotting part(optional): the phase in the slotting part can be adjusted electrically at 360°.
- The whole machine is combined controlled pneumatically with the function of counting, alarming and operating at the back of the machine.

Technological parameter

Paperboard thickness	3 or 5 layer paperboard	
Control	PLC & TOUCH SCREEN	

SRS-FG-D Model Double Pieces Folder Gluer (Twin-box Folder Gluer)

2 PCS of Corrugated Paper Folder Gluer Machine

RYH-A high speed double pieces folder gluer can do double AA, double AB and single piece carton gluing and forming. This machine can replace traditional manual work, and benefit by its specific working method, it can increase the production capacity and quality effectively.

Technological Parameter

Model	QHFG-2000D	QHFG-2200D
Max. paper size	1000 × 720mm	1100 × 850mm
Min. paper size	450 × 320mm	450 × 320mm
Total power	6kw	6kw
Overall dimension	3570X3100X1200mm	3570X3300X1200mm

SRS-FG-S Folder Gluer Machine

Introduction:

Semi-auto Carton Gluer Machine is mainly used for the glue of the carton. It can glue for 3-layer, 5-layer, 7-layer paperboard and so on. The machine structure is easy, working is stable, operation is simple, production efficiency is high, gluing quality is good, production cost is very low. The cost is 15times lower than steel wire stitcher machine.

Technological Parameters:

Model	QHFG-S
Max. Size (L+W)*2	2460mm
Min. Size (L+W)*2	340mm
Max. Size (W+H)*2	1515mm
Min. Size (W+H)*2	240mm
Paperboard feeding height	900mm
Power	2.2kw
Mechanical Speed	40m/min
Machine Packing Size	4.5*1.95*2.0m
Machine Weight	2000KG

SRS-FG-Press Gluer Machine

Introduction:

Semi-auto Carton Gluer Machine is mainly used for the glue of the carton, box, and special shape boxes. It can glue for 3-layer, 5-layer, 7-layer paperboard and so on. The machine structure is easy, working is stable, operation is simple, production efficiency is high, gluing quality is good, production cost is very low. The cost is 15times lower than steel wire stitcher machine.

Technological Parameters:

Model	QHFG-P
Max. Size of product	1800*1100mm
Min. Size of product	200*200mm
Normal working speed	6000-10000 boxes/hour (based on double working)
Mechanical Speed	56m/min
Machine Size	2.2*2.4*1.3m

SRS-B Automatic Corrugated Box Folder Gluer

Introduction

SRS-B Automatic Corrugated Box folder gluer series high speed automatic corrugated folder gluer are using imported electrics and parts, especially for export, able to pre-press the paper and have a better pasting effect ,able to pre-press the paper and have a better pasting effect ,also have a wide application ,this series have features like nice appearance ,high speed ,flexible adjustment ,big width range . Specially for making boxes from flute F,E,C,B like wine box ,carton box ,average speed 8000pcs/hr depends on different box size ,this series widely applied to wine factory carton factory and the other post press finishing ,this series save labor force by four fifths ,also reduce the glue by two thirds ,it's preferred product for post-press finishing .

Main technical parameter

SRS-1050B

Type of boxes	(Amax)	(Amin)	(Bmax)	(Bmin)	(Cmin)	(Dmin)	(Fmin)

box	1200mm	150mm	1850mm	180mm	12mm	100mm	81mm

Technological Parameter

Linear velocity	0 ~ 220m/min
Suitable paper quality	220 ~ 800g / m ² cardpaper F flute and E flute paper
Paste box basic form	One size edge pastes ,two side edge pastes
Feeding way	Automatically and continuously feeding
Needed power	AC380V 7 KW
Weight	2200KG
Overall Size	7500X1450(1650)(1850)X1300mm
The scope of Count	0 ~ 999999

SRS-A Full Automatic High-speed Corrugated Box Folder Gluer Machine (Pre-fold and crash lock-bottom)

Introduction

SRS-A Series is a new economical High speed and crash lock bottom automatic folder gluer .The forming shape is beautiful, more convenient to open. Separate transducer operation is more economical, more practical models. Professional for the wine box, gluing side keep straight no inclined, sticky boxes degree of intensity, will not be break and cracks, etc., can do 15,000 or more per hour like the wine box with crash lock bottom. Also be used for various types of crash lock bottom boxes, medicine boxes, cosmetic boxes and do simple box.

Main Technological Parameters

SRS-840A

Type of box	Amax	Amin	Bmax	Bmin	Cmin	Dmin
